

# BHMI Intern Program

## About BHMI

For more than 30 years, Baldwin Hackett & Meeks, Inc. (BHMI) has been designing, developing, and implementing mission critical applications for companies in a wide range of industries. All members of the BHMI team are located in BHMI's state-of-the-art Corporate Development Center in Omaha, Nebraska. To learn more about BHMI, please visit [www.bhmi.com](http://www.bhmi.com).

## Intern Program

BHMI offers a unique and rewarding intern program for students enrolled at Nebraska universities. An internship at BHMI will allow you to work on exciting projects and to contribute in a meaningful way. No data entry, watching operational logs, working a help desk, or deploying workgroup products. Below are some of the benefits you will receive during your internship at BHMI:

- Participate as a member of a software development team, contributing to the successful delivery of software solutions
- Assist with projects that employ contemporary and emerging technologies
- Apply principles, theories, and tools you have learned in the classroom to solve actual operations, transaction processing, workflow, and user problems/situations
- Gain real-world programming experience with object-based languages (Java, C#, C++)
- Obtain exposure to a wide range of development environments (JEE, .NET, SOA, SharePoint, Seam)
- Learn a large variety of hardware platforms, operating systems, and database structures (Oracle, MS SQL, DB2)
- Work with Web technologies (Java Server Pages, Javascript, JBOSS, IIS, Apache)
- Springboard your career in software development

## How BHMI is Different

- BHMI believes your academic work takes priority over BHMI work assignments
- Hours are flexible, so you can work as few as 16 hours a week or as many as 29
- BHMI's core business is software development, so you learn from individuals who specialize in creating software for a wide variety of companies and industries versus one specific company or industry
- You work side-by-side with and have constant access to BHMI's software engineer professionals
- BHMI offers highly competitive wages
- BHMI provides complimentary snacks, beverages, and Friday Afternoon Club
- You can participate in company outings (e.g., summer picnic, holiday party, etc.)

## Education

To qualify for the BHMI Intern Program, you must be enrolled in or working toward a degree in Information Science, Computer Science, or Computer Engineering with a focus on programming or software development.

## Apply Today

Close to 100 students have participated in BHMI's intern program and upon graduation; many have accepted full-time positions at BHMI. If you are interested in working with a proven and experienced software development company, we hope you will apply today.
